PERSONAL DETAILS

Date of Birth: March 5,2004
Gender: Female

Leetcode problems solved: 120
Freelanced a project: Mean Stack

SKILLS

- App development(Android studios)
- Angular
- TypeScript
- JavaScript
- MongoDB
- SQL
- NodeJS
- C
- C++
- Python
- Core Java
- Advanced java
- C#
- Data Structures
- HTML (Markup Language)
- CSS

LANGUAGES KNOWN

English
Marathi
Hindi

EDUCATION

Graduation:
Course: BE (Computer Engineering)
College: Pune Institute of Computer Technology
Year of Passing: 2026 (Currently in Second Year)
Score: First Year CGPA (9.68)

Schooling:	**Class XII**	**Class X**
Board Name:	Maharashtra	Maharashtra
Medium:	English	English
Year of Passing:	2022	2020
Score:	91.17%	95.4%

PROJECTS:

Project Name: Designing a profile website for Company(Freelancing)

Technology: MEAN stack

Description:

Link:
https://angular-fa929.web.app/
(In process)

• This project has Angular used in frontend with material design and bootstrap used.

• It has NodeJS and ExpressJs for server-side development.

• It has MongoDB used as Database.

• This project consists of authentication routing, json-server implemented, and well-structured code with all basic concepts implemented.

Project Name: Lesion Lens

Technology: App development using android studio and ML project deployment.

Description:

• This project is build to detect the type of lesion(cancer).

• This project using images to be entered in the app and ML model will detect the type of lesion.

• App development is done using android studios.

Project Name: Chat Application using Socket Programming

TECHNICAL HIGHLIGHTS:

• Knowledge of FULL Stack Project MEAN.

• Knowledge of databases like MySQL and MongoDB.

• Knowledge of App development(Android)

• Knowledge of deployement of projects.

• Application development using C, C++, Java, Python, C#.

• Knowledge of Socket Programming, JDBC connection, Application development using Swing and AWT.

Technology: Java

Description:

• In this project we created two applications as Client and server.

• Inside the client application we have to create a socket object which connects the server by specifying the IP address and port number.

• Inside Server application we have created two objects- one for the server socket and one for socket.

Project Name: File Packer Unpacker

Technology: Java

Description:

• This Project is used to Perform Process monitoring activity.

• By Using this Project, we can fetch data from all files and merge it into one file. As well as we can also extract all packed files whenever required.

• Main Purpose of this project is to merge large number of files into one file by avoiding memory wastage.

Project Name: Virtual File System

Technology: C++ Programming

Description:

• This project provides all functionality to the user which is same as Linux File system.

• It provides necessary commands, system calls implementations of file system through customized shell.

• In this project we implement all necessary data structures of file system like Incore Inode Table, File Table, UAREA, User File Descriptor table.

Project Name: AI Based Writing Aid

Technology: Python Programming

Description:

• AI Based Writing Aid with ML, you can draw on the screen by only waiving your finger around in Air.

• This Project is Developed with OpenCV and Media Pipe libraries of Python.
